

Nano-Cathedral

Newsletter n.3 | November 2017

Dear Reader,

I'm pleased to present the third NANO-CATHEDRAL newsletter.

It is an exciting time for our project since only 6 months left to the end of the project and so many things have happened in recent months.

We will update you on the most important events we've been involved in and finally we will talk about 3 of our cathedrals: Santa María, St. Stephen and St. Bavo.

Finally, we are proud to inform you that our project has been reported as a success story by the European Commission and it was chosen as the subject for a TV documentary on latest European research on cultural heritage preservation. The report is a co-production between EuroNews and the European Commission, and it was aired in June 2017 - for a whole week (22 times) - in the award-winning programme Futuris, on European science, research and innovation. The documentary was broadcasted to 430 million households in 130 countries in EuroNews' thirteen broadcasting languages (English, Italian, German, Spanish, French, Portuguese, Russian, Arabic, Turkish, Persian, Greek, Ukrainian and Hungarian).

I hope you'll enjoy it.

Andrea Lazzeri | Project Coordinator

News from the Project

A SUCCESS STORY

Nano-Cathedral project on European Commission website.

Latest Meetings

[5th TECHNICAL MEETING and
ADVISORY BOARD MEETING
Oslo \(Norway\) | 8-9 June 2017](#)

INTERNAL WORKSHOP

Vienna (Austria) | 10 August 2017

Latest Local Workshops

OSLO OPEN CONFERENCE | 7 June 2017 | Oslo (Norway)

VIENNA LOCAL WORKSHOP | 21 September 2017 | Vienna (Austria)

GHENT LOCAL WORKSHOP | 24 October 2017 | Ghent (Belgium)

NEXT

Nano-Cathedral Vitoria Local Workshop

The Fourth stage of the cycle of workshops on Nano-Cathedral project will be organized in Vitoria-Gasteiz (Spain)

25-26 January 2018 - Santa María Cathedral Vitoria-Gasteiz (Spain)

We will talk about:

- The problems of stone decaying, how to recognize and describe them according to international standards, including a practice on the real stones of Santa María Cathedral.
- The results of NANO-CATHEDRAL project
- Presentation of a complete plan for the whole restoration of the stone facades of the Cathedral.

Focus on Cathedrals

After the Oslo Opera House, described in the June's newsletter, we will talk about other 3 Cathedral involved in Nano-Cathedral project. You'll read about last two cathedrals in next newsletter

Do you know all about Santa María Cathedral?

Santa María Cathedral is a collection of multipurpose buildings constructed during a range of different historical periods.
